Visit our beautiful new Garden and Gift Shop

Besides the plants we have listed in this list, we handle a complete line of annuals, bulbs, house plants, and other items not mentioned in this list. See us for prices on these items.

PRICES: Prices in this catalogue are subject to change without notice. The prices include delivery to St. Louis and St. Louis County. An extra charge will be made for packing where shipping is necessary.

GUARANTEE: Plants are living organisms which can fail because of a number of causes; unfavorable situation, poor soil, drouth, extreme temperatures, ignorant or careless handling, attack by insects or disease. Because these causes are beyond our control we cannot assume full responsibility for growth of stock.

We do, however, guarantee that the plants will be healthy, vigorous plants true to name. When we have planted the plants and there is evidence that the plant has been properly cared for, we will replace any plants that died within one year from date of planting at one-half list prices. This does not include annuals, perennials, roses, greenhouse plants or grass, nor the cost of the labor of planting again. Our responsibility ceases after one replacement.

LANDSCAPE DEPARTMENT

The creator of a beautiful landscape must be as much of an artist as the creator of a beautiful building. The landscape architect must be a master of the principles of design just as the architect must be. He must also have a thorough knowledge of his materials; plants. He must know the sizes the various plants will attain at maturity, the color and texture of the plants in various seasons, the soil and situation requirements.

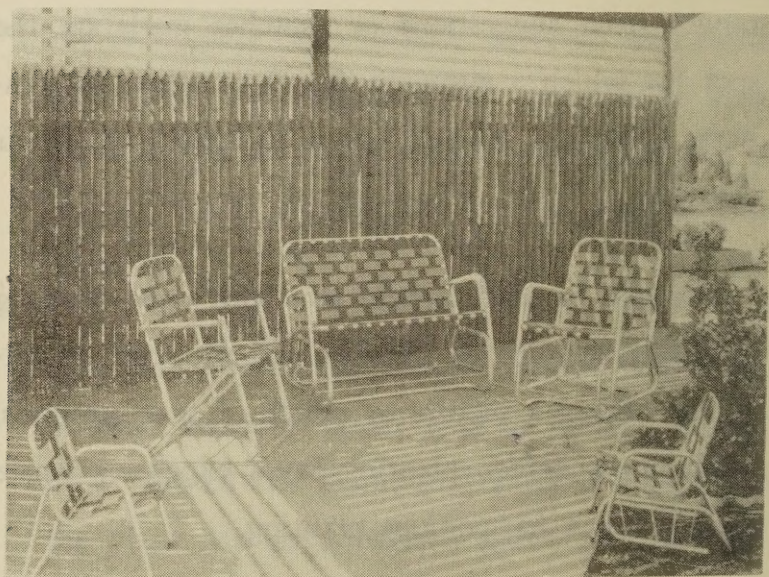

For these reasons we have graduate landscape architects connected with the firm, to help you with your design and planting problems. This help ranges from suggestions or sketches made on the spot for which a minimum charge is made, to complete, carefully studied plans for which a fee is charged.

We will be glad to help you with your planting problems here at the nursery without cost or obligation. Bring a picture or sketch of your grounds.

Planning, before planting saves expensive waste and assures a harmonious planting.

View of the patio area outside the Garden Shop where our garden furniture is displayed. The shelter is constructed with our "Alumalath" shading.

Another of our garden display areas showing a combination of our "Cedarcraft" woven sapling fence for protection and privacy, Alumalath for shade, and Tennessee Flagstone for paving. Shown in the shelter is one line of our aluminum and plastic furniture.

All the garden and patio areas around the Nursery grounds were designed by our landscape architects and built by our construction crews to show some possibilities for better outdoor living.
